DETAILED ACTION

Allowable Subject Matter

Claims 1-4 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a method for concealing errors in a regenerated digital signal. The sole independent claim identifies the uniquely distinct feature of "replacing the low frequency contents during an error by a low frequency approximation of the single bit bitstream and converting the low frequency signal obtained after the replacement into a regenerated single bit bitstream (y(n)) with concealed errors by means of a sigma-delta modulator". The closest prior art, Lawlor (US 5,353,059), discloses a conventional method for concealing errors in a digital signal fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew B. Smithers whose telephone number is (571) 272-3876. The examiner can normally be reached on Monday-Friday (8:00-4:30) EST.
